EXCELLENCE IN WAREHOUSING MANAGEMENT - MODULE 2

A Workshop by Ahmar J. Iqbal

Management Association of Pakistan

27th November 2019 | 10.00 am - 4.30 pm
Royal Rodale Club, Karachi

OVERVIEW

Warehousing plays a vital role in supporting the organizations to deliver superior service levels to the internal and external customers. Efficient warehousing contributes in reducing the operating cost and eliminating waste that result in improved organizational profitability.

Excellence in Warehousing Management is a two-module program. Module 1 was about business challenges, importance of warehousing in the organizational realm, roles of the warehouse and the warehouse manager, and all the processes that are performed in the warehouse.

Module 2 will cover the good warehousing practices, design of warehouses and its layout options, the storage and the handling equipment used, warehouse management systems, resourcing the warehouse operations, understanding and managing various costs involved in the warehouse, measuring and managing warehouse performance and health and safety in the warehousing operations.

WORKSHOP CONTENTS

- Good Warehousing Practices
- Warehouse Layouts
- Warehouse Management Systems
- Warehouse Storage and Handling Equipment
- Resourcing and Costs
- Key Performance Measures – Score Card
- Health & Safety

WORKSHOP METHODOLOGY

The program will be conducted through specialist instructor input, participants' discussion and involvement, exercises, quizzes, case studies and supportive course manual. Participants will be encouraged to discuss their organizational issues and collectively find solutions based on the facilitator's and participants experience.

LEARNING OUTCOMES

The participants will learn effective methods of increasing productivity, optimizing costs, improving customer service level, maintaining employee health and safety. This program will help participants to improve personal knowledge on warehousing and to improve the performance of company's warehouses. The key deliverables would be;

- Understanding the Good Warehousing Practices
- Understanding the basic designing of a warehouse and select the appropriate materials flow arrangement.
- Getting awareness on utilizing warehouse management systems, handling equipment, and storage systems
- Understanding the methods for resourcing and costing the warehouse and implementing the key performance measures.
- How to bring about efficiency of warehousing operations to delight Customers.
- How to identify, evaluate and analyze health and safety issues in the warehouse, its impact on the environment, and how to reduce this impact.

WHO SHOULD ATTEND

Warehousing, Distribution, Logistics and Supply Chain Professionals
